SKILLS

HTML5, CSS, Sass, JavaScript, React, Redux, Git, C++, Responsive Design, Python, Node.js, Mongo DB, MySQL

PROFILE

I am a full-stack developer, Petroleum Engineer, amateur photographer, gaming enthusiast and most succinctly: a jack of all trades.

Although I have many interests, my main passion has been web development since graduating from BrainStation's Web Development diploma program in Dec 2020. Specifically, I love problem solving and creating impactful web services. My interests lie in both the front-end and back-end of development.
